DETAILED ACTION

Currently, claims 1-28 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to an isolated nucleic acid, a fragment thereof, an expression vector comprising said nucleic acid, a host cell thereof, and a method of recombinantly producing the encoded polypeptide, wherein the polypeptide has the amino acid sequence of SEQ ID NO:2 classified in class 435, subclass 69.1.
- II. Claims 15-28, drawn to an isolated nucleic acid, a fragment thereof, an expression vector comprising said nucleic acid, a host cell thereof, and a method of recombinantly producing the encoded polypeptide, wherein the polypeptide has the amino acid sequence of SEQ ID NO:5 classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because:

Inventions I and II are distinct and unrelated because the nucleic acids in the two groups are physically distinct chemical entities, which share neither structure nor function, and encode different polypeptides. Each of SEQ ID NOs is a unique and separately patentable sequence, requiring a unique search of the prior art. Searching all of the sequences in a single patent application would constitute an undue search burden on the examiner and the USPTO's resources because of the non-coextensive nature of these searches.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different recognized divergent subject matters, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1646

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
